Learning by Doing:
Coral Restoration
(BALI BLUE YOUTH ACTION 2025)

Learning from local experts about coastal ecosystems and their impact on climate resilience:

Coral reefs cover just 1% of the ocean floor yet support nearly 25% of marine life, making their protection crucial for the future of our oceans. (Sources: NOAA Fisheries; NASA Earth Science; UNEP.)

Learning by Doing:
Mangrove Ecotourism
(BALI BLUE YOUTH ACTION 2025)

Learning from local experts about coastal ecosystems and their impact on climate resilience:

Mangroves protect coastal waters and help fight climate change by filtering pollutants and storing large amounts of carbon (Blue Carbon). (Sources: NOAA; UNEP.)
